

Supporting Rapid Growth with SAP® Analytics Cloud

Before: Challenges and Opportunities

- Create a stable and scalable solution for resource management and reporting
- Eliminate manual and time-consuming work that leads to errors in data
- Encourage cooperation and knowledge exchange among stakeholders
- Boost operational effectiveness and establish reliable internal controls

Why SAP

- Long-standing, trusted partnership with experts from SAP
- Ability to unify group processes and data on a single platform with the SAP® Analytics Cloud solution
- Self-service capabilities
- User-friendly solution
- Native integration with SAP S/4HANA®

After: Value-Driven Results

- Enhanced efficiency with a more intuitive user interface for reporting
- Increased predictability, enabling accurate decision-making
- Enabled greater visibility with one integrated space for financial records, replacing diverse spreadsheets across more than 40 entities

“SAP Analytics Cloud has helped us achieve a **unified view** of our operations, eliminating manual spreadsheet activities.”

Miroslav Lazarov, SAP Analytics Cloud Consultant, SumUp Limited Branch Bulgaria

6x

Faster finance and reporting consolidation, from six days to one day with automation

30x

Decrease in data discrepancies with automation
